Nationality: Indian

Personal Profile

Pursuing a Bachelor's degree in Computer Science and Engineering at Kalinga Institute of Industrial Technology with interests in problem solving, software development, and computer fundamentals, including DSA, databases, and programming. Continually working on improving technical and analytical skills through development projects, coding practice, and participation in tech events and hackathons.

Education

2024 – 2028: BTech in Computer Science

Kalinga Institute of Industrial Technology, Bhubaneswar, India

GPA: 9.27/10.00

Relevant Coursework: Core Computer Science fundamentals , MCP servers , AI Engineering

2021 – 2023: Delhi Public School

Jorhat, Assam

Percentage: 85

Key Interests: AI Engineering , Neural Networks.

Projects/Research

Rays DeckForge - AI Powered Presentation Generator | 2026

[MoonShot]

- Architected an end-to-end automated pipeline that converts natural language prompts into production-ready PowerPoint presentations using LLM-based content generation.
- Engineered a Model Context Protocol (MCP) server enabling seamless integration between the presentation engine and an autonomous AI agent, supporting real-time prompt-to-deck workflows.
- Extended the open-source Presenton framework with custom modifications for local models, improving generation flexibility by over 60%.
- Deployed the system to validate automated generation of 20 presentations from complex multi-step prompts, reducing manual deck creation time from hours to minutes.

Skills

Python, C/C++, Java, Linux.
Languages: English (Fluent), Assamese (Native)
